

## Models for SDG Acceleration across Africa

Frederick Mugisha SDG integration Advisor for Africa United Nations Development Programme

Africa is making significant progress, but the development deficit is much deeper than many of us want to believe or want to appreciate. It is therefore important that we push in the same direction every time and all the time.

### Good news

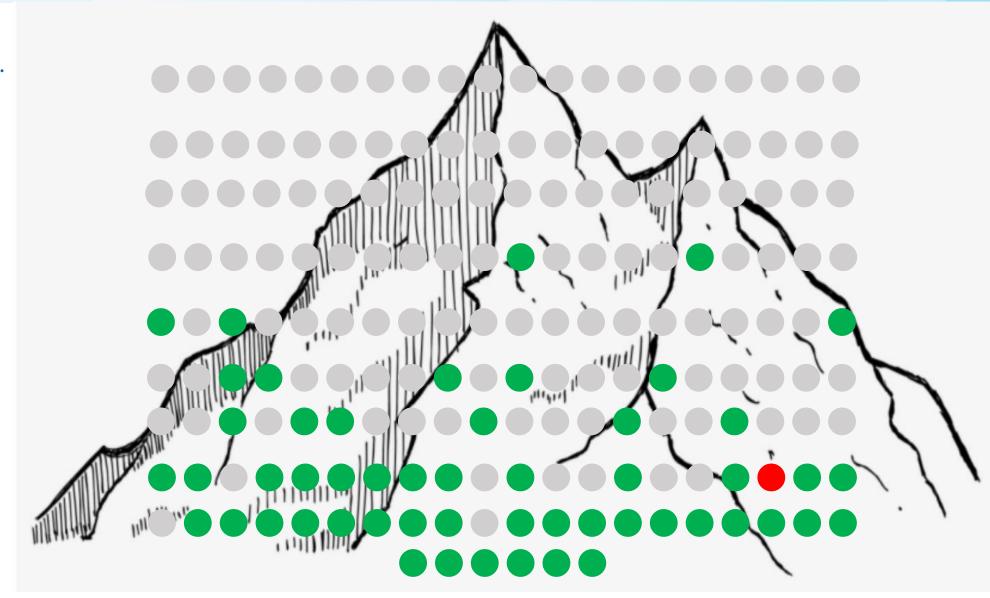

In the last 2 decades, of the top 20 fastest growing economies in the world, at least 2-3 are in Africa.

## Not enough Progress

League 1.

League 10.

## ... not enough means

## Combined expenditure of all African Governments is:

2.3% of all World Governments.

11% of the United States Government.

The consensus to accelerate the delivery of this future is already in place and models to accelerate this progress are taking shape.

### Consensus

It is about accelerating own development

#### **Models for SDG Acceleration Actions**

#### Focus

• 1-3 actions

#### Multiplier

Actions must impact across

#### Scale

Depth, spatial, generational

Internet for Everyone (Mexico)

One-District-One-Factory (Ghana)

# Development Planning is central to our efforts to accelerate the SDGs

## Some of Uganda's actions could be game changers in accelerating the SDGs & A2063

### Uganda's great initiatives

#### Digitization

• 80% Gov't service on line, better feedback mechanisms

#### **Parish Model**

Positive deviants, light on table top; fit for purpose

#### Multi-Sector Platforms and coordination

SDG Secretariat and the focal Minister for SDGs

## Consider the SDG Secretariat to take on the role of Africa Union Agenda 2063
